A UX/UI Designer's Journey

About me

A UX/UI Designer with 1.5 years of experience and a strong focus on detail. My expertise lies in translating complex challenges into elegant solutions and transforming conceptual ideas into engaging experiences. Originally, I studied civil engineering, but my curiosity about how digital products can improve people's lives led me on a new path. My journey into UX/UI Design was shaped by mentorships that helped me discover my passion. Throughout this journey, I have gained valuable insights into how to blend user research with design principles effectively. From crafting wireframes to sculpting interactive prototypes, I honed my visual design abilities to create interfaces that are not only visually appealing but also functional and user-friendly.

My civil engineering background instilled in me a commitment to pixel-perfect accuracy, ensuring every detail aligns with the overall design vision. It also helped me develop strong time management and organizational skills. I excel at meeting tight deadlines and delivering high-quality work, ensuring a seamless design process from concept to launch.

Education

- **UX/UI Web Design, Digital Egypt Pioneers Initiative (DEPI)**

Apr 2024 – Oct 2024

In this internship I conducted user researches to identify user needs and pain points, applying UX principles to inform design decisions. I learned to iterate on designs based on user feedback and testing results. Also mastered tools like Figma, Adobe XD.

- **UX/UI Practical Training Program, Developer Career**

Oct 2023 – Jan 2024

In this internship I learned about user research and testing to understand user needs and behaviors. I created user personas and information architecture to structure the user experience, and then built wireframes and prototypes to visualize the design.

- **UX/UI Design, Mentorship**

May 2023 – Aug 2023

I underwent a 4-month mentorship program with a seasoned UX/UI Designer, where I delved into user research, design thinking, and wireframing to create intuitive user flows and visually appealing interfaces.

What Can I Add

Innovative Design Solutions

I am passionate about pushing the boundaries of design, creating innovative and visually stunning interfaces that captivate users.

Problem-Solving Skills

I excel at breaking down complex challenges into manageable steps and finding creative solutions.

Detail-Oriented Designer

My civil engineering background made me commit to pixel-perfect accuracy, ensuring that every element of the design is flawless.

Effective Collaboration

I can work with teams to achieve common goals and contribute ideas and solutions that enhance the design process and foster innovation.

A User-Centric Approach

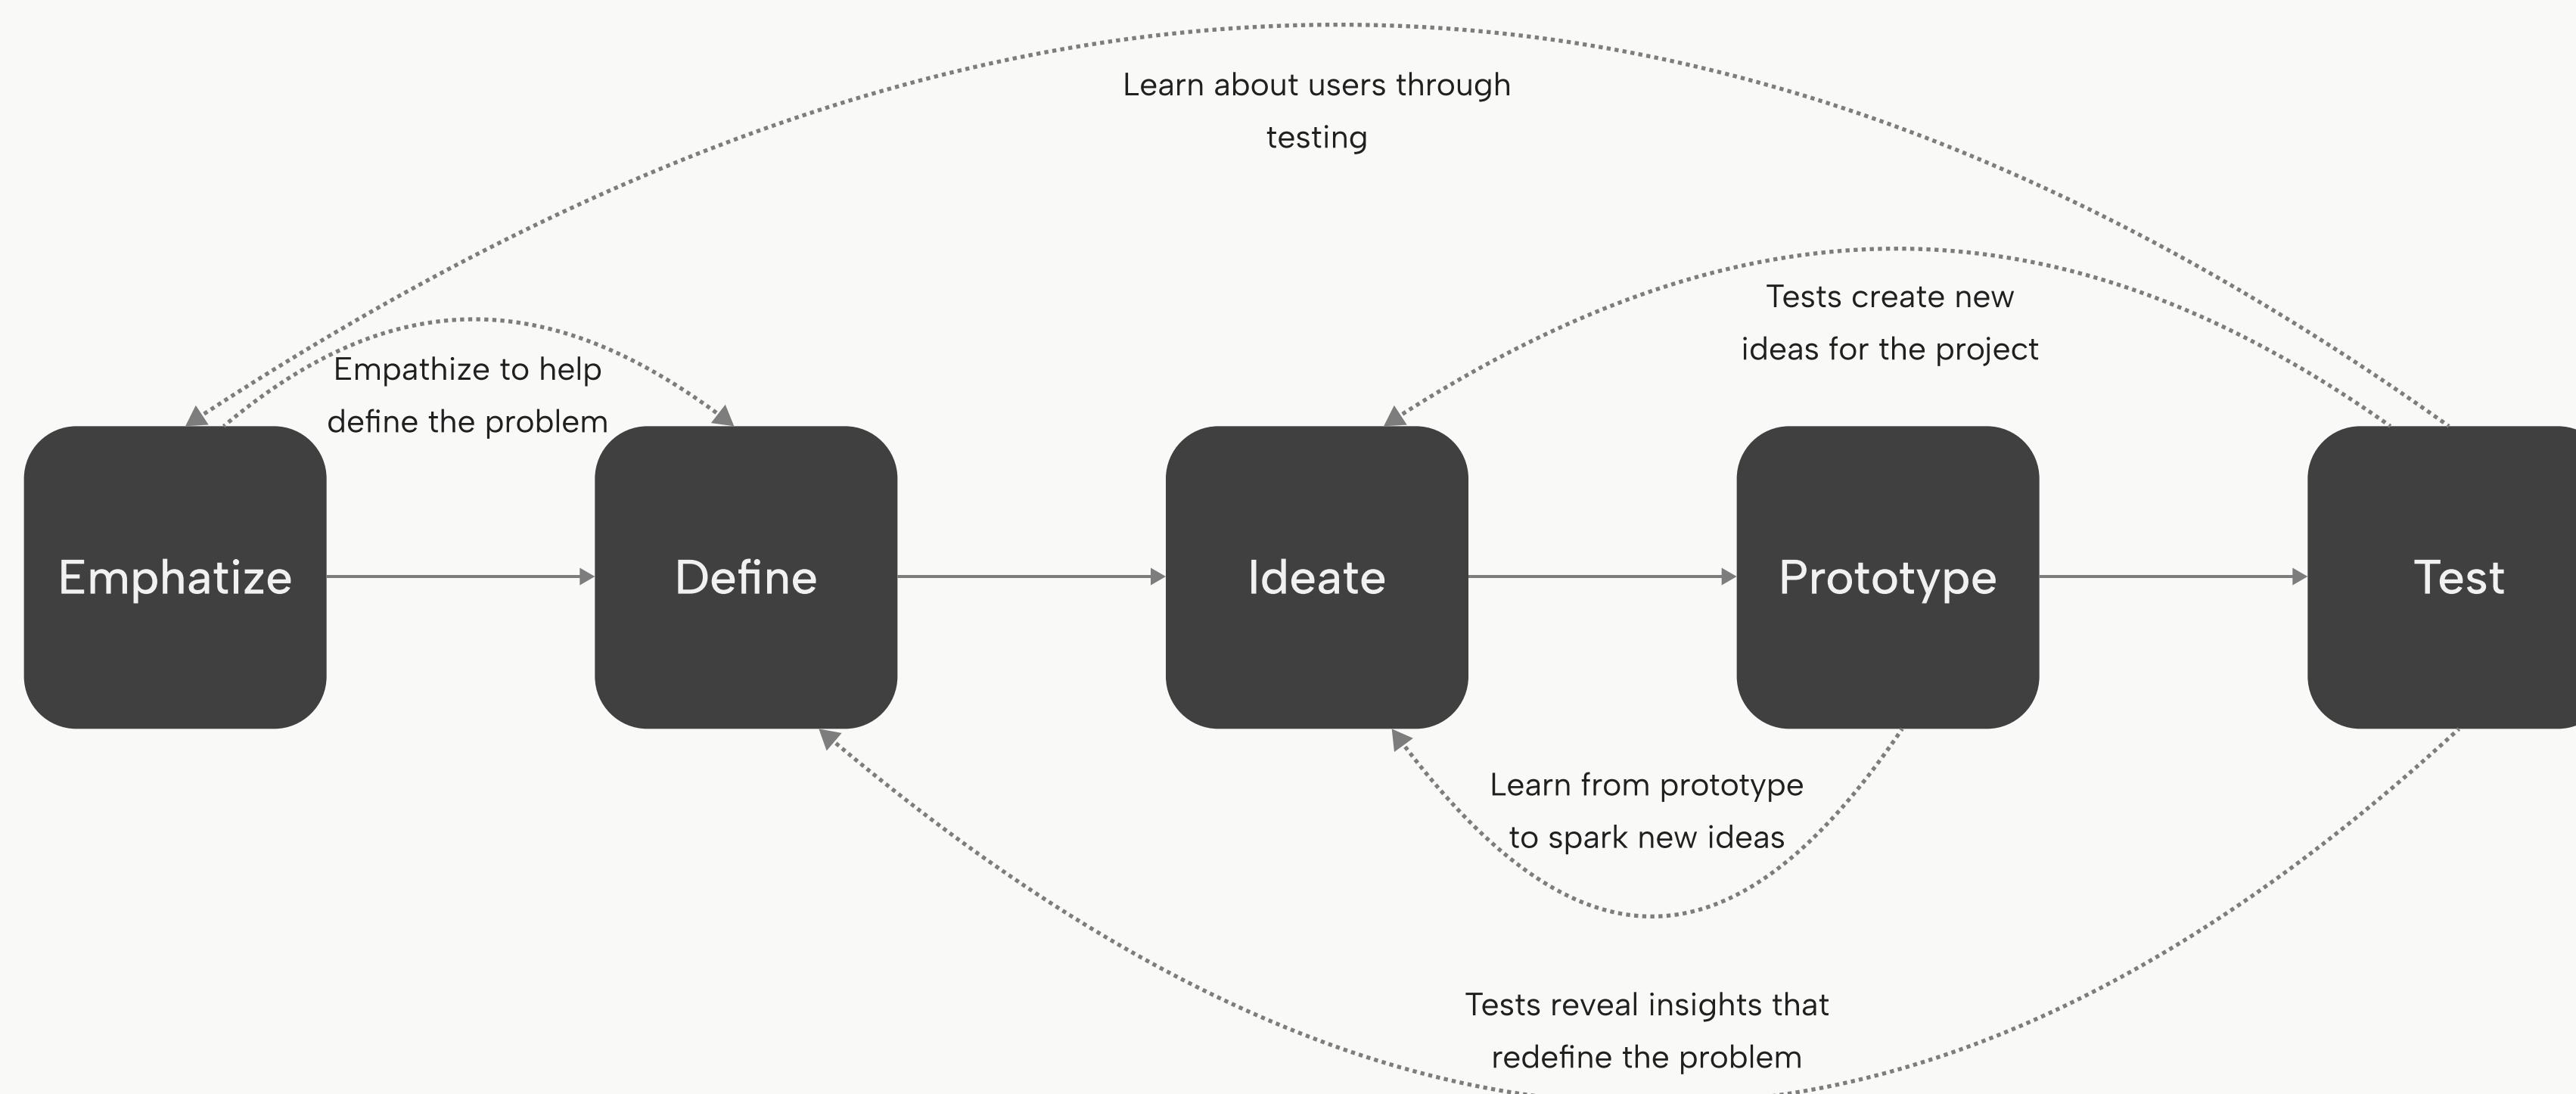

I prioritize user needs and conduct thorough user research to inform design decisions.

Adaptability

I am quick to adapt to new tools, design trends, and project requirements.

My Process

I utilize Design Thinking modes based on the available inputs and iterate whenever needed. Also, I choose research methods based on research questions, goals, as well as time and budget constraints

Agenda

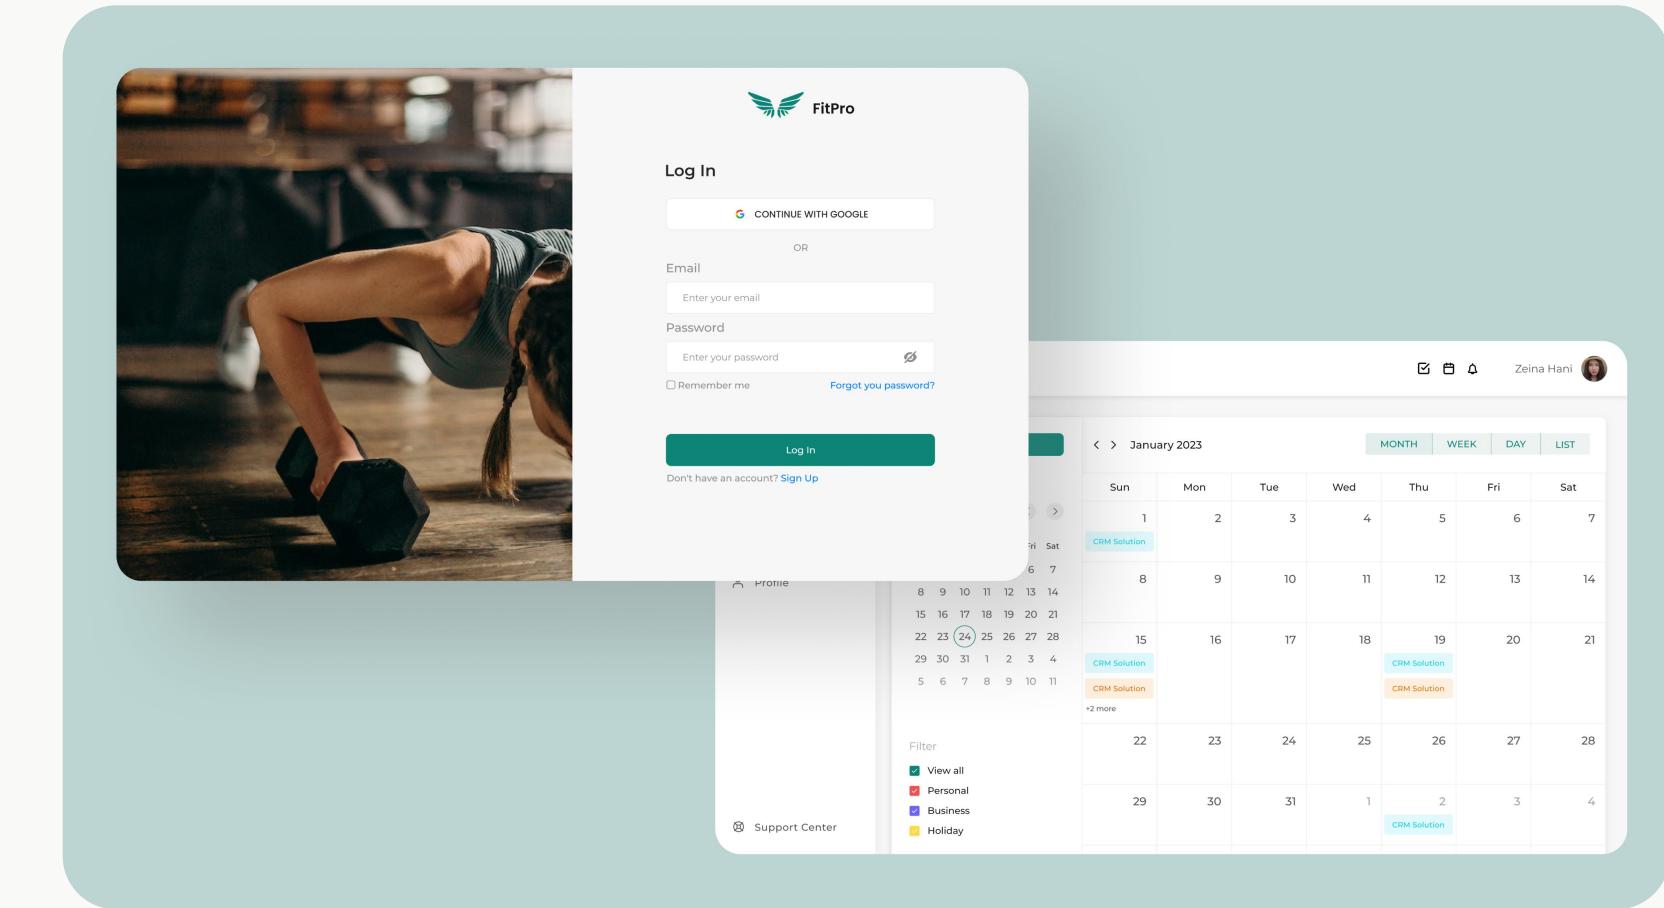

01

RentHaven App

02 FitPro - Dashboard

FitPro is a comprehensive health and fitness platform that connects users with a network of qualified trainers, nutritionists, and physical therapists. I improved the design process for the Service Provider Dashboard, creating a design system to ensure consistency. I also developed the Information Architecture for both the mobile app and website, created wireframes, UI designs, and interactive prototypes for various features, including calendars and tables.
